

Polycom® Premier Video Communication Solutions

Simple, Flexible, Convenient.

The Polycom Premier solution offers customers choices in system packaging and design. From the traditional TV grade display to plasma monitors ready for use within the executive suite, the Premier package has the right configuration for any type environment.

Choose a traditional single display for small to medium sized conference rooms and add a second monitor to display meeting data from remote and local viewers. Or choose a large plasma solution and eliminate the need for a conference room projection system.

Each Premier solution ships with a high performance sound system that delivers crystal clear audio when coupled with Polycom's industry leading voice technology.

Premier solutions can be used with either a Polycom iPower™ or ViewStation™ video conferencing system. The Premier Solution provides a simple and convenient way to purchase a complete video communication system.

Premier Video Communication Solution Specifications

Premier Multimedia 32 and Premier Multimedia 29

The Premier Multimedia 32 provides high-quality live video display coupled with high-resolution data sharing. Used in conjunction with the iPower system and ImageShare™, or ViewStation system and Visual Concert™, both people and content can be displayed simultaneously at the highest resolution with the Premier Multimedia 32. The package includes a single 32-inch NTSC display (best for live video), and a 32-inch XGA monitor for high-resolution data and graphics. Also included is a high-fidelity Bose® sound system and custom-designed mobile cart. (Premier Multimedia 29 includes 29-inch PAL display and 32-inch XGA monitor.)

Premier Dual 32 and Premier Dual 29

The Premier Dual 32 enables customers to combine a ViewStation system with dual 32-inch NTSC displays, an integrated, high-performance Bose® sound system and custom-designed mobile cart for a flexible solution well-suited for a wide range of collaboration environments. The dual monitor support is ideal for simultaneous full-screen viewing of remote and local video.. (Premier Dual 29 includes dual 29-inch PAL displays.)

Premier 32, Premier 29 and Premier 27

Ideal for small offices or conference rooms, the Premier 32 provides a compact solution for viewing of live video and data sharing on a single display. The Premier 32 includes a 32-inch NTSC display, integrated high-fidelity Bose® sound system and custom-designed mobile cart. The Premier 32 can be packaged with a ViewStation system. (Premier 29 includes a 29-inch PAL display and the Premier 27 includes a 27-inch NTSC display.)

Premier Plasma 50

The ultimate, state-of-the-art solution, the Premier Plasma 50 includes a 50-inch multimedia NEC plasma display delivering crisp video quality, an integrated sound system for high-fidelity audio communications, and a custom-designed mobile cart. When sharing data, the 50-inch plasma display provides split-screen viewing of both people and content on a single display and is well suited for use with Polycom's ImageShare for the iPower system and with Visual Concert for the ViewStation.

The Premier Plasma 50 provides the highest resolution of any 50-inch plasma monitor available, with XGA (1024 x 768) or a native panel resolution of 1365 x 768 — suitable for 16:9 Wide XGA computer graphics. It also features a digital zoom that allows users to select a portion of the screen and magnify it up to nine times.

The Premier Plasma 50 can be mounted on a wall, placed on a table or added to an optional rollabout cart.
