

Polycom® Wireless Tablet

Portable control at the touch of a pen

Highlights

Ideal for Educational Environments – Completely controls the conferencing system, VCR, document camera, and mouse operations for web browsing or annotating with ease and mobility that enhances an instructor's ability to connect with students and direct the lesson

Control a Conference from Anywhere in the Room – Lightweight, wireless tablet that instructor, student or any user can use to easily manage a conference and interact with content from anywhere

Ultimate ease of use of "the pen" – The familiarity of a pen interface (everyone has used one since preschool!) provides the fastest, most comfortable, and versatile way to work with your conferencing and collaboration system

Pen Control of Meeting Tools – When used with the iPower Meeting Tool Assistant software option, easily play, rewind, or stop a VCR tape, and focus or zoom in on an object using a document camera - all at the tap of the pen

Choice of Tethered or Wireless Pen Control – Comes with a tethered pen that can't get lost or walk out of the room. Or, configure the pen for wireless use

Something for Everyone – Offers everyone from professors and students to business users and doctors a powerful new way to work directly on the screen. With something for everyone, Polycom's Wireless Tablets give the world an easier, more natural way to use iPower solutions to work and collaborate

This lightweight tool is an easy pen-based way to use the full range of iPower™ features.

Instructors, students or business users can make a call, control a camera, or choose a People or Content source simply by using the electronic pen to tap the appropriate button on the tablet. The pen can also be used in the same way a mouse is used to control the cursor on the iPower screen. The Polycom Wireless Tablet can be used separately or together with the iPower wireless keyboard and remote control devices.

Using Bluetooth™ wireless technology to communicate with the iPower system, the Polycom Wireless Tablet provides a wireless connection to your conferencing and collaboration system, enabling you to control a conference from anywhere in the room. The tablet can also be used to control making a presentation, annotating on content for emphasis, or accessing the Web when the system is not on a video conferencing call.

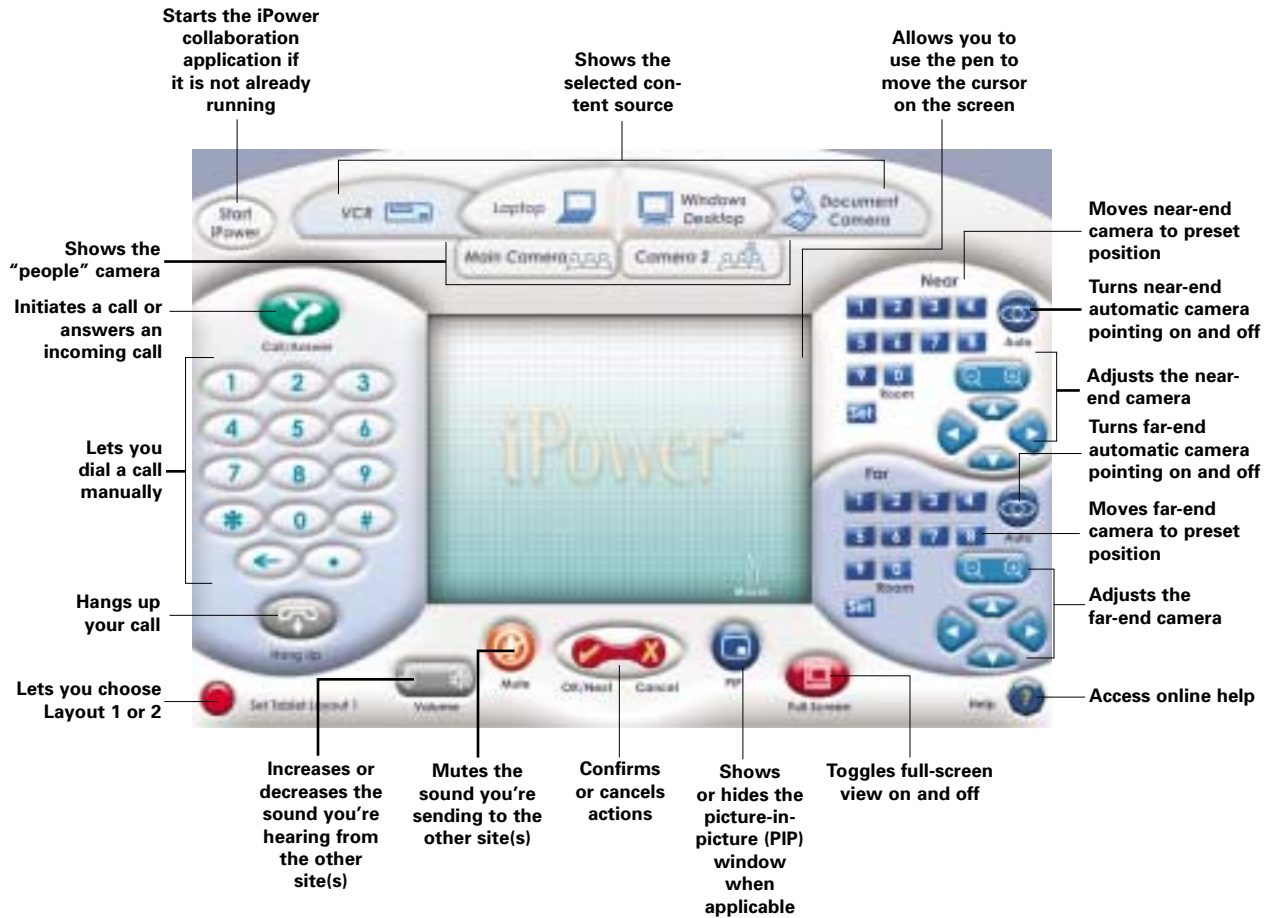

Holding the portable Polycom Wireless Tablet, instructors can freely move around the classroom, paying attention to individual students while the lesson is displayed on Polycom's iPower multimedia collaboration system. The Polycom Wireless Tablet, which comes complete with an electronic pen, is ideal for writing notes, highlighting key points, and controlling applications on your iPower system, as well as incorporating Internet sites into your lesson plan.

Video

Connect. Any Way You Want.

The Polycom Wireless Tablet Layout – includes buttons for performing all of the tasks you need for making calls and sharing content. A second layout can be chosen which also allows control of document cameras and VCRs from the same tablet interface.
